How To Order

The G180 is available with exactly the features that you desire. To configure your nozzle, simply select one item from each of the categories below to form the part number. For example, a nozzle with 1.5" Flared spout and bumper ring, 1.5" NPT inlet without check valve, Standard Grounding cable and Dust Cap, and Black Handle Guard — would be part number G180-LBTB.

G180-NNNB SPOUT INLET N = None N = None **B** = 1.5" NPT A = 1" Straight / No Bumper Ring No check valve **C** = 1" Straight With Bumper Ring **D** = 1.5" NPT **E** = 1.5" Straight / No Bumper Ring With check valve **G** = 1.5" Straight With Bumper Ring **F** = 1.25" NPT No check valve **H** = SPEED SPOUT[™] including 2 spouts (1" straight and 1.5" flared)

H = 1.25" NPT

K = 1" NPT

M = 1" NPT

R = 1.5'' ISO

S = 1.5" ISO

T = 1" ISO

The G180 Nozzle is built on a modified G457 chassis. The G457 has been the preferred nozzle of many military organizations around the world for many years. In opting for the G180, you will benefit from the experience we have

lve	Kit	
ive	i cit	

EMCO WHEATON is a firm believer in repair kits. Each nozzle – which is shipped in a box with a large label showing model number and serial number - contains operating instructions and a diagram similar to the one shown depicting the repair kits available for that nozzle. Each kit includes instruction sheet and all components and consumables needed to repair the specific wear zone.
